BAAAM navigation flow

Navigation flow of the Angular frontend for Document 3 (BAAAM-44 / BAAAM-97), taken from the routes, guards, header menus, and in-page links as of Nov 5, 2026.

Sources

- `src/frontend/src/app/app.routes.ts`
- `src/frontend/src/app/core/guards/auth.guard.ts`
- Header menus in `src/frontend/src/app/app.component.ts` (`CLIENT_NAV` , `PROVIDER_NAV` , `ADMIN_NAV`)
- `routerLink` , `navigate` , and `navigateByUrl` calls under `src/frontend/src/app/pages`

Guards

Guard	Allows	Redirect when blocked
`guestGuard`	Signed-out users	Signed-in admin to `/home-admin`, provider to `/home-provider`, client to `/home`
`authGuard`	Any signed-in user	Signed-out to `/login?reason=auth&returnUrl=<page>`
`providerGuard`	Signed-in service providers whose account is active (`isServiceProvider` and `isActive !== false`)	Signed-out to `/login?reason=auth&returnUrl=<page>`, admin to `/home-admin`, anyone else to `/home`
`adminGuard`	Signed-in admins (`isAdmin`)	Signed-out to `/login?reason=auth`, provider to `/home-provider`, anyone else to `/home`

Every provider and admin route lists `authGuard` first, so a signed-out user is always stopped by `authGuard` (with a `returnUrl`) before `providerGuard` or `adminGuard` runs.

After sign-in, `login.component.ts` sends the user to `returnUrl` if it is a safe, role-appropriate path, and otherwise to their role's home page (`/home-admin` , `/home-provider` , or `/home`).

Header menus

The header (and its Sign out button) is shown on every page except login and the three signup pages.

Role	Menu items
Client	Home (`/`), Calendar, Appointments, Notifications, Statistics, Settings
Provider	Home (`/home-provider`), Calendar, Create appointments (`/create-slots`), Notification, Settings, Stats
Admin	Home (`/home-admin`), Requests, Accounts, Appointments (`/appointments-admin`), Activity

`/` redirects to `/home` . Sign out always goes to `/login` .

Routes by role

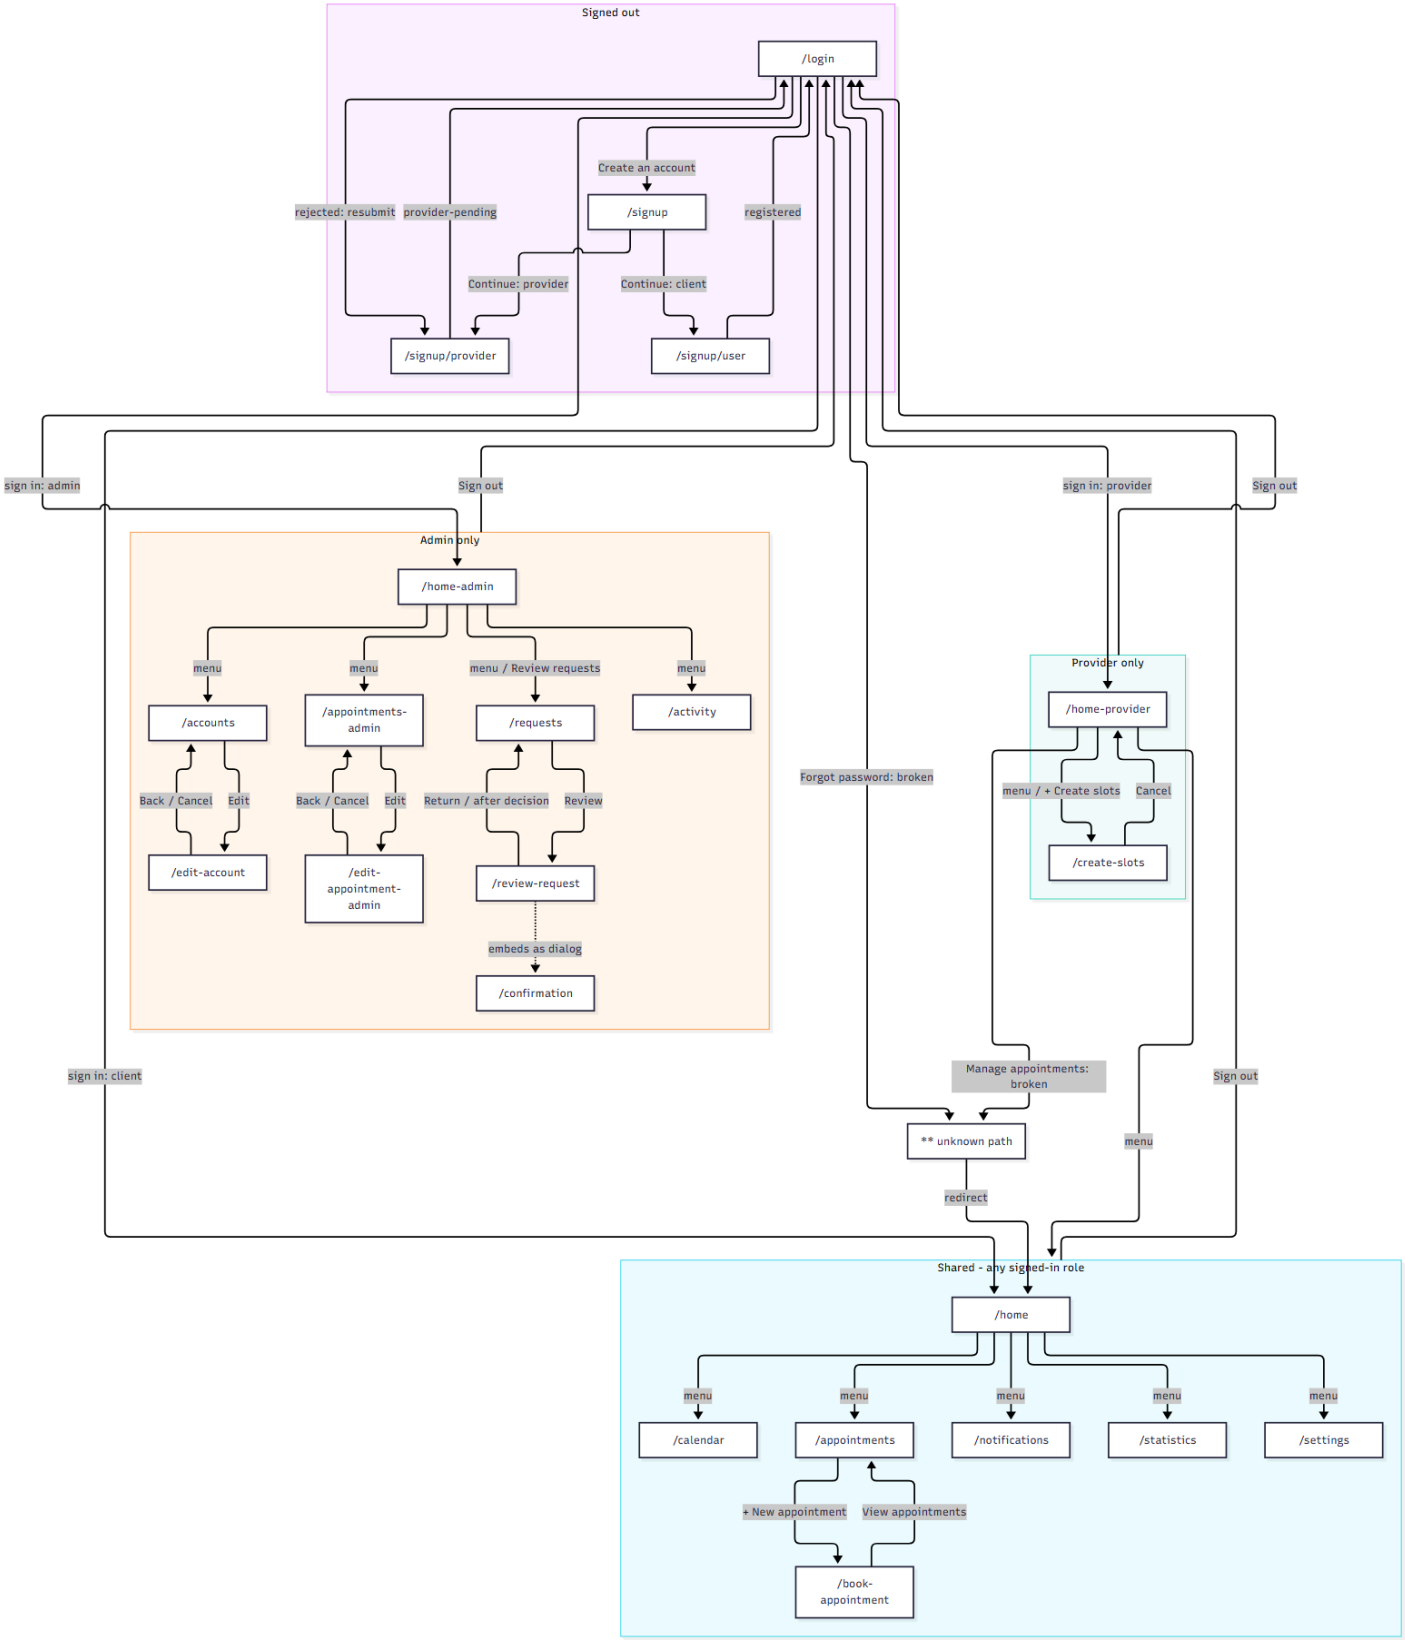

"Shared" means the route checks only `authGuard` , so every signed-in role can open it.

Path	Guards	Signed out	Client	Provider	Admin
`/login`	`guestGuard`	Yes	Role home	Role home	Role home

`/signup`	`guestGuard`	Yes	Role home	Role home	Role home
`/signup/user`	`guestGuard`	Yes	Role home	Role home	Role home
`/signup/provider`	`guestGuard`	Yes	Role home	Role home	Role home
`/home`	`authGuard`	`/login`	Yes	Shared	Shared
`/calendar`	`authGuard`	`/login`	Yes	Shared (menu)	Shared
`/appointments`	`authGuard`	`/login`	Yes	Shared	Shared
`/book-appointment`	`authGuard`	`/login`	Yes	Shared	Shared
`/statistics`	`authGuard`	`/login`	Yes	Shared (menu)	Shared
`/notifications`	`authGuard`	`/login`	Yes	Shared (menu)	Shared (URL only)
`/settings`	`authGuard`	`/login`	Yes	Shared (menu)	Shared (URL only)
`/home-provider`	`authGuard, providerGuard`	`/login`	`/home`	Yes	`/home-admin`
`/create-slots`	`authGuard, providerGuard`	`/login`	`/home`	Yes	`/home-admin`
`/home-admin`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/requests`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/review-request`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/confirmation`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes (no link)
`/accounts`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/edit-account`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/appointments-admin`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/edit-appointment-admin`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`/activity`	`authGuard, adminGuard`	`/login`	`/home`	`/home-provider`	Yes
`''` (empty)	redirect	`/home`	`/home`	`/home`	`/home`
`**` (anything else)	redirect	`/home`	`/home`	`/home`	`/home`

Diagram 1: page transitions

Arrows are links, buttons, menu items, and the navigation that happens after an action (sign in, sign up, sign out). To keep the chart readable, header-menu arrows start from each role's home page even though the menu is on every signed-in page, and Sign out is drawn once per role.

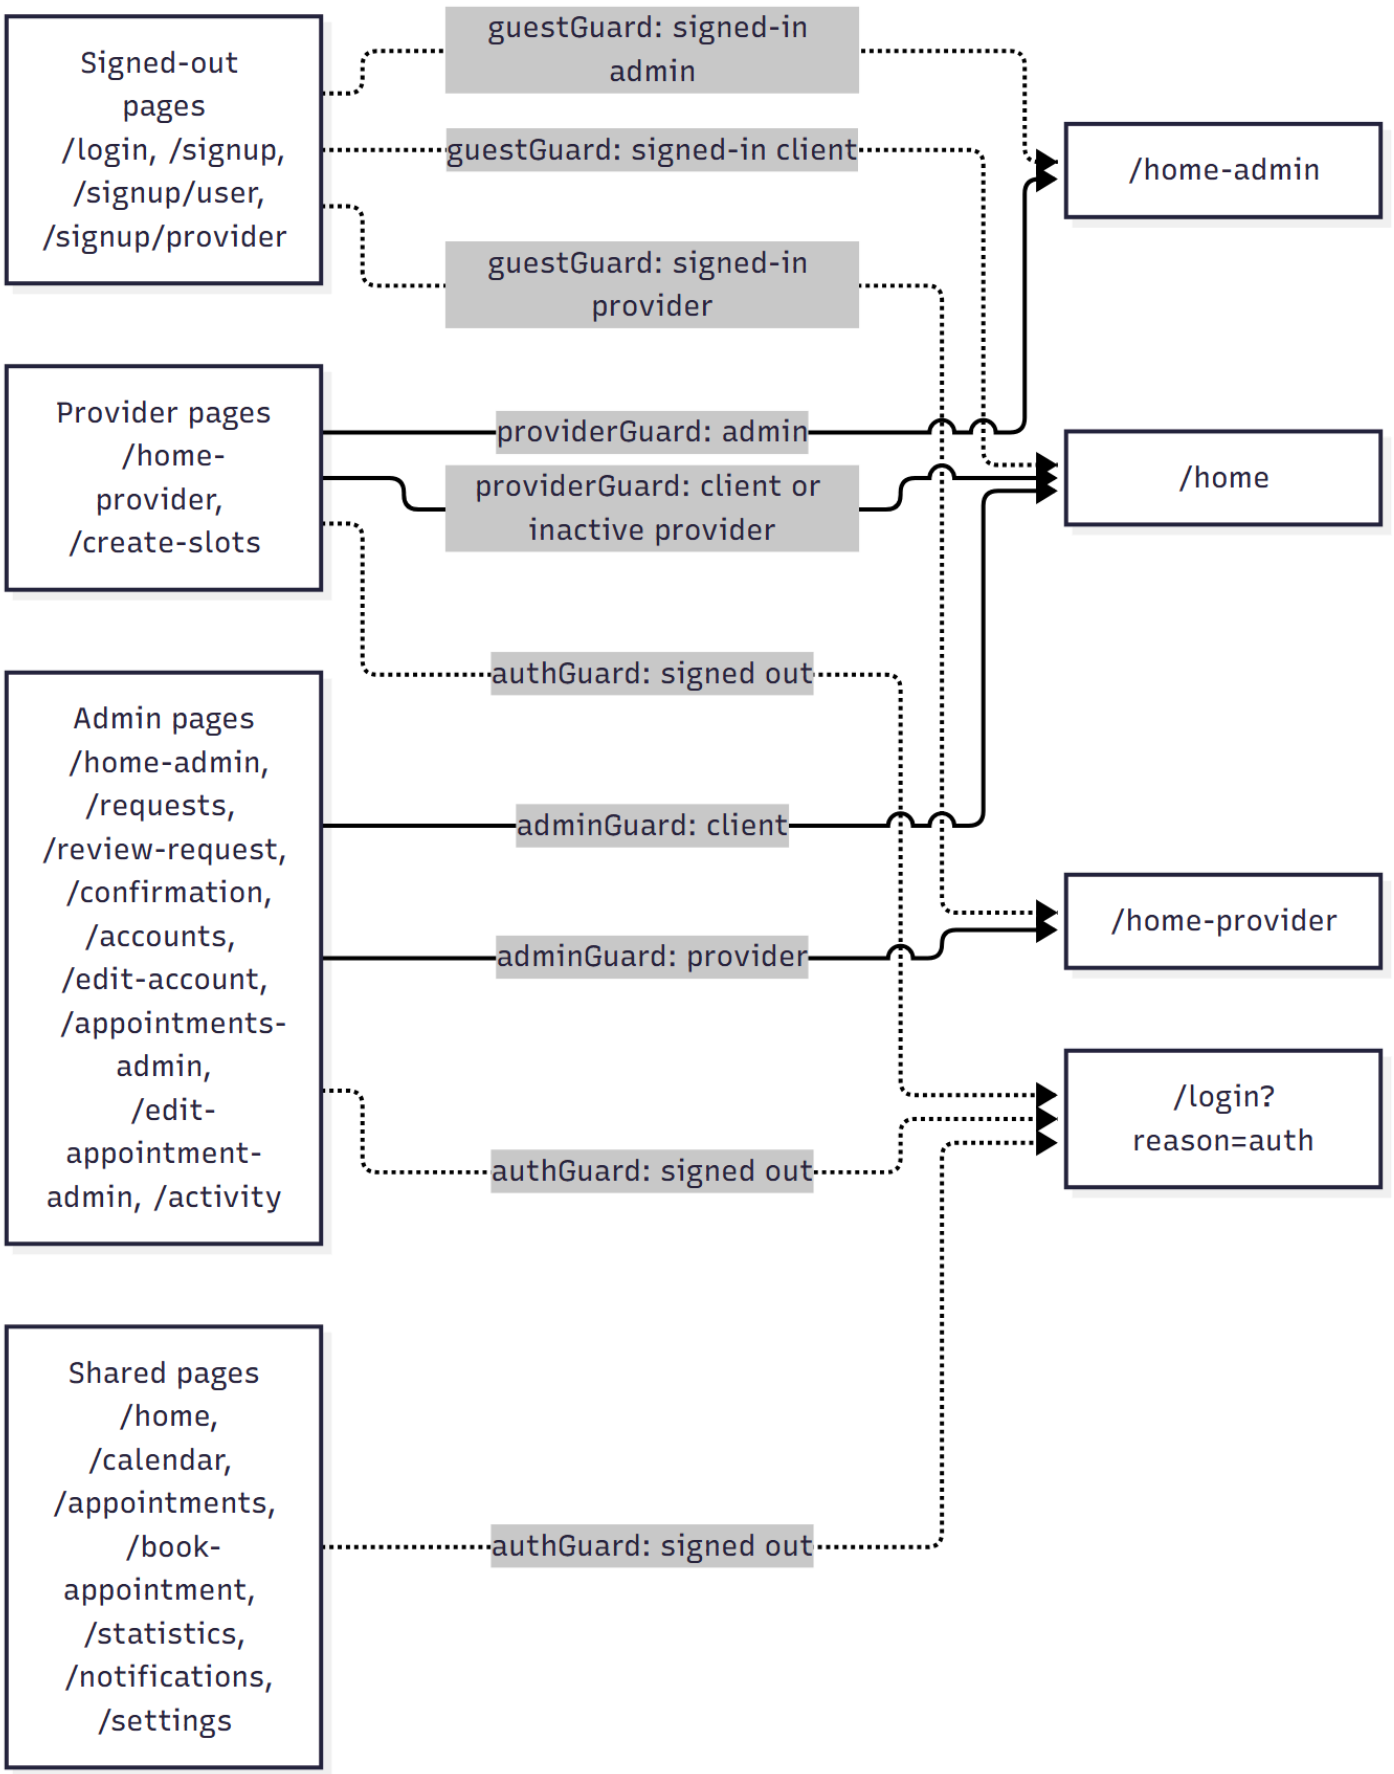

Smaller links left off the chart: the "Account type" and "Sign in" back links on the signup pages, the client home's "Book an appointment" button (it opens `/appointments`), and the `''` empty path, which redirects to `/home` like `**`. The provider menu arrow points at the whole shared

group; the menu's shared items are Calendar, Notification, Settings, and Stats.

Diagram 2: guard redirects

What happens when someone opens a page they aren't allowed on. Each box is a group of pages from the routes table; the arrow label names the guard and who it stops.

Signed-out pages /login, /signup, /signup/user, /signup/provider
guestGuard: signed-in admin
guestGuard: signed-in client
guestGuard: signed-in provider
/home-admin
Provider pages /home-provider, /create-slots
providerGuard: admin
providerGuard: client or inactive provider
/home
authGuard: signed out
Admin pages /home-admin, /requests, /review-request, /confirmation, /accounts, /edit-account, /appointments-admin, /edit-appointment-admin, /activity
adminGuard: client
adminGuard: provider
/home-provider
/login? reason=auth
authGuard: signed out
Shared pages /home, /calendar, /appointments, /book-appointment, /statistics, /notifications, /settings
authGuard: signed out

Findings

1. **`home-provider` is declared twice** in `app.routes.ts` (lines 164 and 185). The router uses the first match, so the second entry is dead configuration.
2. **Client pages are shared with every role.** `/home`, `/calendar`, `/appointments`, `/book-appointment`, and `/statistics` check only `authGuard`, so providers and admins can open them by URL. The same is true of `/notifications` and `/settings`. The provider menu links to calendar, notifications, settings, and statistics on purpose.
3. **The admin menu has no Notifications or Settings item**, although admins can open both pages by URL.
4. **`/confirmation` has no link.** It is an admin route, but the confirmation prompt is actually used as a dialog inside `/review-request`.
5. **Two links point at routes that don't exist**, so the `**` catch-all sends them to `/home`:
   - "Forgot password" on login links to `/forgot-password`. A signed-out user is redirected to `/home`, then `authGuard` sends them back to `/login` with "Please sign in first."
   - "Manage appointments" on the provider home links to `/provider`. The provider lands on the client home page.
6. **"Book an appointment" on the client home opens `/appointments`, not `/book-appointment`.** Booking starts from "+ New appointment" on the appointments page.
7. **The `adminGuard` doc comment is out of date.** It lists six admin pages and leaves out `edit-account`, `edit-appointment-admin`, and `activity`, which BAAAM-148 added. The guard still protects them.
